

ICRSA 2003
Changes in Program
(As of May 21, 2003)

1. Mark Anderson's talk in Session 10 (Invited) entitled "Process Quality and Reliability" has been withdrawn.
2. Li Linxiong's talk in Session 16 (Contributed) entitled "An EM Algorithm of Distributions with Accelerated Life Test Data" has been withdrawn.
3. Dan Scharfstein's talk in Session 33 (Invited) entitled "Semiparametric Bivariate Location-Shift Regression Model" has been withdrawn.

Remark: These talks were withdrawn after the Program and Abstract Books went on print, and so we were unable to replace them or to reshuffle speakers to accommodate these changes.
